MARPOL MEPC 63 Annex V Amendment

With reference to: MEPC 63/23/Add.1, Annex 24
RESOLUTION MEPC. 219 (63)
Adopted on 2 March, 2012

In "2012 GUIDELINES FOR THE IMPLEMENTATION OF MARPOL ANNEX V", under chapter Garbage Management, Page 4, the following statements are made:

1.7.4 While cleaning agents and additives contained in hold wash water, and deck and external surface wash water are considered "operational wastes" and thus "garbage" under Annex V, these cleaning agents and additives may be discharged into the sea as long as they are not harmful to the marine environment.

1.7.5 A cleaning agent or additive is considered not harmful to the marine environment if it:

.1 is not a "harmful substance" in accordance with the criteria in MARPOL Annex III; and

.2 does not contain any components which are known to be carcinogenic, mutagenic or reprotoxic (CMR)

1.7.6 The ship's record should contain evidence provided by the producer of the cleaning agent or additive that the product meets the criteria for not being harmful to the marine environment. To provide an assurance of compliance, a dated and signed statement to this effect from the product supplier would be adequate for the purposes of a ship's record. This might form part of a Safety Data Sheet or be a stand-alone document but this should be left to the discretion of the producer concerned.

With reference to the fore mentioned IMO guidelines, Vecom Marine have made the following statement:

We, Vecom Marine, hereby declares the below listed Vecom Cleaning agents manufactured by us meet the criteria for not being harmful to the marine environment as described under item 1.7.5

We will emphasise that this statement is not valid for chemicals put on the market with identical or similar product names manufactured by others. The name of Vecom Marine must be mentioned on the product label and in the Material Safety Data Sheet.
