## Vecom introduces the Vikan Transport System®

In its efforts to provide an even more extensive service for its customers Vecom began last year to look for an effective addition to its existing range of detergents. We succeeded in finding a good partner in the area of consumables such as brushes, handles and wipers. This to enhance even further our position as One-Stop-Shop. A survey of the potential candidates swiftly revealed that the programme of the Danish manufacturer Vikan was the most appropriate to us: flexible, robust and high quality.

The Vikan Transport System® provides the following benefits

- complete assortment of professional cleaning tools for the transport sector
- ergonomic (user friendly)
- durable
- safe in use
- mutually interchangeable

Brushes from the Vikan Transport System® provide the following benefits:

- soft, firm and resilient
- temperature resistant 80 °C
- water retentive
- stain and smear free
- paint protective
- oil and chemical resistant
- dirt loosening
- adjustable
- extremely durable

The handles of the Vikan Transport System® offer you the following benefits:

- insulated and sturdy aluminium
- ergonomic (wrist / hand / back)
- water connection via hose union / rapid-action coupling
- temperature resistant 80°
- adjustable [telescopic structure]
- various lengths
- extremely durable
- Approved as complying with working conditions legislation

Our field service staff will be happy to demonstrate all the possibilities to you.
