

Water Finder Special

For water detection in gasoline and diesel fuel tanks

- Fast and simple water detection
- Results instantly visible due to distinct colour change
- Economical in use
- The paste adheres well to the dipstick
- Also works in the presence of water, methanol or tertiary butanol
- The paste contains no toxic or environmentally harmful ingredients

APPLICATION

Water Finder Special changes colour from pale pink to bright red when it comes into contact with water present under fuel or mineral oils. Water can cause significant corrosion in storage tanks and other devices. It is therefore extremely important to regularly check for the presence of water.

PROPERTIES

Water Finder Special is a pale pink paste that has been specifically designed to measure the water level under fuel or other light mineral oils in storage tanks.

Colour : pale pink
Flash point : none

INSTRUCTIONS FOR USE

Apply the paste to the bottom of the dipstick and lower it to the bottom of the tank. Once the dipstick has been raised again, presence of water is instantly visible as the paste will have turned red.

HAZARDS & PRECAUTIONARY STATEMENTS
